## Corporate Training System

TRAISY

In recent years, online learning turns out to be more and more practiced. It represents an easy and comfortable method to achieve knowledge in almost every field. E-learning is a great alternative for corporations, especially for companies which can't afford the time, money, or human resources to train their employees. Currently, many corporations are having problems to find a suitable system that can provide them an environment for online education.

We build a system called TRAISY, which allows any corporates to post their training program with ease and privacy on our website. Through our system, staffs can access to training anywhere and anytime, making learning and training more effective, faster and easier. For corporations' admin and manager, they can manage their programs effortlessly, and view their employees' statistics.

"The best advice I ever got was that
knowledge is power and to keep studying"
